**Note that this course is a part of the Math Performance Success Program.**

**Program Mission**

The Math Performance Success (MPS) program established at De Anza Community College in 1999, aims to help all underrepresented students meet their goals by improving student success in math through innovative and collaborative approaches including extended lecture time, in-class tutoring, and embedded counseling services.

**Program Philosophy**

The MPS program team members are dedicated to the philosophy that any willing student with the proper support and services can succeed in mathematics. Instructors, counselors, and tutors collaborate to help students complete their mathematics requirements. **The MPS program is designed for students who have had previous difficulty with Math.**

**Structure**

*How does an MPS Math Classroom look like?*

Students in the MPS program attend math class for two hours a day, approximately 10 hours a week, double the class time compared to a stand-alone math course. This extended instructional time, provides ample time for lecture, class activities, mindfulness, and group work. Tutors are available during the second part of the class to assist students who have questions about the material. Counselors also use the second hour of this class to check-in on students and make sure they are on track in succeeding in the course.

Important contact information:

|   |  |
|---|--|
| Director, STEM Success Program<br>Yvette Campbell, PHD<br>campbellyvette@fhda.edu | Khoa Nguyen, M.A., M.S.<br>Counselor/Coordinator<br>nguyenkhoa2@fhda.edu |
| Program Coordinator<br>Deepa Yuvaraj<br>yuvarajdeepa@fhda.edu                     | Tutor TBA  |

If you have any questions regarding the program, you can contact myself or anyone listed above. Preferably the counselors.

**Required Text and Recommended Materials:**

- Textbook: Calculus: Early Transcendentals, 9th Edition, J. Stewart. **The MPS program provides the book for you so contact any one of the counselors if you need the book.**
- Calculator: Although not necessary for most of this course, it can sometimes be helpful to have access to some type of graphing calculator. This can be a physical graphing calculator or a free online graphing tool such as <https://www.desmos.com/> or <https://www.wolframalpha.com/>.

- Access to <https://deanza.instructure.com/>. Canvas is where all the course information will be available. Information regarding grades, lectures, resources, etc.

**Goals for Students in the Course:**

- To build a solid foundation for future math courses.
- To build confidence in their academic abilities in the math class and beyond.
- Be able to collaborate and discuss mathematics with classmates.
- To gain intuition behind concepts in the course.

**Grading:**

|                 |         |         |             |       |
|-----------------|---------|---------|-------------|-------|
| 3 Midterm Exams | Quizzes | Project | Discussions | Final |
| 40 %            | 35 %    | 5 %     | 5%          | 15 %  |

|               |              |
|---------------|--------------|
| Grading scale |              |
| 90-99.9% A    | 70-77.9% C   |
| 88-89.9 % B+  | 68-69.9 % D+ |
| 80-87.9% B    | 60-67.9% D   |
| 78-79.9% C+   | ≤ 59.9 F     |

**Exams 40 %:** There are 3 midterm exams. The lowest midterm exam score will be dropped.

**Content Check-In 35 %:** Content check-ins are packets you turn in weekly. The packet will consist of two parts. One part will be a collection of exercises assigned during the week and the second part will be a quiz composed of exercises that were assigned during the week.

**Projects 5 %:** There will be one project to enrich your understanding of topics studied in the course and beyond.

**Discussions 5 %:** There will be some informal discussion board topics to build a sense of community.

**Final 15 %:** The final for this course will be a two-hour cumulative exam. The final exam time for this class is on Friday 06/24/2022 from 9:15 AM to 11:15 AM.

Figure 1: Grade breakdown for the course as a percentage.

**Assignment submission recommendation:** All assignments will have due dates posted but I will still accept your assignment if it is not completed by the due date. If for some reason you cannot turn in an assignment, turn it in as soon as possible. This is to avoid falling behind with the material which can be detrimental toward your experience in any STEM course.

**Attendance:** This class will be synchronously held via Zoom (link posted in Canvas).

**You may be dropped from the course if:**

- You miss 2 homework sets and or quizzes in a row.
- You do not interact with Canvas for a week.
- You miss 2 full weeks of synchronous meetings without contacting me prior to missing those meetings.

Note that if for any reason you feel like you may need to drop the course, it is your responsibility to do so.

**How to Succeed in this Course:**

- The Student Success Center tutors and workshops area a great place to start! Watch the [SSC Welcome Video](#) to learn more.

**Tutoring:** Go to <http://deanza.edu/studentssuccess> and click to join a Zoom tutoring room during open hours.

**Workshops:** Attend a [Skills Workshop](#), a [content-specific math/science workshop](#), an [Accounting chapter review workshop](#), or a [Listening and Speaking workshop](#).

**Resources:** Join the [SSC Resources Canvas site](#) to see content and learning skills links.

**After-hours or weekend tutoring:** See the [Online Tutoring](#) page for information about NetTutor (via Canvas) or Smarthinking (via MyPortal).

**It is known that students who participate in tutoring, group study, or workshops for three or more hours a week succeed at much higher rates than those who do not. The students who most need the help may reluctant, but if you take the first step in seeking resources you will be glad you did.**

- I encourage students to make use of office hours! This is another great place to get help on material related to the course.

**Disability Statement:** If you have a disability related need for academic accommodations or services in this course, you will need to provide me with a Test Accommodation Verification Form (TAV form) from Disability Support Services (DSS) or the Educational Diagnostic Center (EDC). Students are expected to give a two week notice if they are in need of accommodations. For those students with disabilities, you can obtain a TAV form from their DSS counselor (408 864-8753 DSS main number) or EDC advisor (408 864-8839 EDC main number). The application process can be found here: <https://www.deanza.edu/dsps/dss/applynow.html>

**Academic Integrity:** If it is suspected that academic dishonesty is taking place on an assignment, the college will be notified and will result in a failing grade on the assignment or a failing grade in the class. For further information on academic integrity please see [https://www.deanza.edu/policies/academic\\_integrity.html](https://www.deanza.edu/policies/academic_integrity.html).

**Course Description:** Fundamentals of integral calculus. (5 units)

**Tentative Course Schedule:**

| Week | Section   |
|------|---|
| 1    | Some review Ch.1 Tangent Lines 2.1, Limits 2.2  |
| 2    | Limit laws 2.3, Def of Limit 2.4 Continuity 2.5,<br>Derivatives 2.7, 2.8  |
| 3    | Polynomial and exponential derivatives 3.1<br>Product and quotient rules 3.2  |
| 4    | Trig derivatives 3.3<br>Logarithmic differentiation 3.6<br>Linear approximation and differentials 3.10<br>Newton's Method 4.8 |
| 5    | <b>Exam 1</b><br><b>Project 1 assigned</b><br>Chain rule 3.4<br>Implicit differentiation 3.5<br>Related rates 3.9             |
| 6    | Hyperbolic functions 3.11<br>Parametric equations 10.1, 10.2  |
| 7    | Infinite limits and horizontal asymptotes 2.6<br>L'Hôpital's Rule 4.4<br>Maxima and minima 4.1                                |
| 8    | <b>Exam 2</b><br>Maxima and minima 4.1<br>Mean Value Theorem 4.2<br>Curve sketching 4.3 - 4.5                                 |
| 9    | Curve sketching 4.3 - 4.5   |
| 10   | <b>Project 1 due</b><br>Optimization 4.7<br>Antiderivatives 4.9   |
| 11   | <b>Exam 3</b><br>Some review  |
| 12   | <b>Final</b> is on Thursday 06/24/2022 from 9:15 AM to<br>11:15 AM.   |

**Important Dates:**

|           |   |
|-----------|---|
| Date      |   |
| April 6   | First day of Spring quarter   |
| May 27    | Last day to drop classes with a W   |
| May 28-30 | Memorial Day Weekend - no classes, offices closed   |
| June 20   | Juneteenth Holiday - no classes, offices closed   |
| June 21   | Finals Week.<br>Final Exam Time for this Class:<br>Friday 06/24/2022 from 9:15 AM to 11:15 AM |

For a more comprehensive list of important dates see <http://www.deanza.edu/calendar/>.

**Student Learning Outcome(s):**

- \*Analyze and synthesize the concepts of limits, continuity, and differentiation from a graphical, numerical, analytical and verbal approach, using correct notation and mathematical precision.
- \*Evaluate the behavior of graphs in the context of limits, continuity and differentiability.
- \*Recognize, diagnose, and decide on the appropriate method for solving applied real world problems in optimization, related rates and numerical approximation.
